Projects

DEVELOPER
Amrita Viswa Vidyapeetam
CENSUS DUTY
🐙 GitHub   **CensusDuty**
- Using Java and Dbms
- This project aim is to create user-friendly and used by government school teachers for census. For census a teacher is given certain number of location that he/she must visit and conduct the census in a location he must visit every house and collect the data from each of them data and the data which they input will be saved in a database and then government can access that database and publish the detailed result of census.

WIKI
🐙 GitHub   **Wiki**
Using Html,Css,Python,Django,PHP
- It is a a Wikipedia-like online encyclopedia. It can be helpful to store encyclopedia entries using a lighter-weight human-friendly markup language. Wikipedia happens to use a markup language called Wikitext, but for this project we'll store encyclopedia entries using a markup language called Markdown.

SEARCH
🐙 GitHub   **Search**
Using Html,Css
- It was an assignment of CS50 Web Programming: a simple clone of Google Search, Google Advanced Search and Google Images purely made with HTML and SCSS..

Competitive Programming

- 4 star coder in Hackerrank in C++
- Solved 100+ questions of Dsalgo on differnt platform

Scholarstic Achievements

AEEE RANK 343
Scholarship for excellence in studies from college
📅 April 2021 – April 2021   📍 Amrita Vishwa Vidyapeetam, Amritapuri
